

SANDRINA MOSLEY

INFORMATION TECHNOLOGY PROFESSIONAL | UNIFIED COMMUNICATIONS ENGINEER | SYSTEMS ENGINEER

Owings Mills, MD 21117 • 410-259-8412 • Sandrinamosley16@gmail.com

PROFESSIONAL SUMMARY

Information Technology professional and Systems/Test Engineer with 20+ years of experience supporting, designing, implementing, testing, and managing enterprise IT, telecommunications, networking, and unified communications environments. Skilled in Microsoft Teams Voice, VoIP, Cisco infrastructure, systems documentation, technical troubleshooting, project coordination, and customer support. Proven ability to lead complex technology initiatives, collaborate with cross-functional teams, develop practical solutions, and work independently in high-accountability environments.

CORE TECHNICAL SKILLS

- Systems Engineering & Architecture
- IT Infrastructure & Operations
- Unified Communications & VoIP
- Cisco UCCX / Contact Centers
- Routers, Switches & Wireless
- Active Directory / LDAP
- PowerShell Scripting
- Project & Vendor Management
- Customer & End-User Support
- Systems Testing & Quality Assurance
- Microsoft Teams / Office 365
- Cisco Unified Communications Manager
- Network Troubleshooting & Monitoring
- TCP/IP, VLANs, QoS, 802.1X
- ServiceNow / Remedy / HEAT
- Technical Documentation & Process Design
- Incident, Change & Problem Management
- Training & Team Leadership

PROFESSIONAL EXPERIENCE

Unified Communications Engineer / Systems Test Engineer / Systems Engineer | Rohde & Schwarz

January 2026 – April 2026

- Develop architectural and system design documentation for Voice Communication Systems supporting Air Traffic Control (ATC) environments.
- Create system designs aligned with customer requirements and review architectural diagrams for accuracy before generating System Configuration Documents (SCDs).
- Generate System Structure Assessments (SSAs) from system structure and architectural diagrams.
- Use PowerShell scripting to modify Visio and Excel documents before preparing SCDs for release.
- Review site surveys and customer orders to validate system structures, architecture diagrams, and implementation requirements.
- Configure and provision Voice Communication Systems, including switches, Controller Working Positions (CWPs), database servers, radio and telephone servers, UMGs, and MWS components.
- Participate in peer reviews, system testing, and system architecture training.

Lead Voice Engineer | CHS Inc. | Client Engagement

December 2024 – March 2025

- Designed, implemented, administered, and supported Microsoft Teams Voice deployments, including troubleshooting and operational readiness.
- Created Microsoft Teams call-flow diagrams, assessments, Auto Attendants, call queues, business-hour schedules, greetings, and holiday messages.
- Collaborated with SharePoint, OneDrive, Five9, and other technology teams to support integrated solutions.
- Implemented call recording for inbound Five9 queue calls and completed pilot testing for Microsoft Teams deployments.
- Led discovery sessions, created voice assessments for leadership, and resolved Unified Communications issues for internal users.

Senior Operations Analyst | Constellation / Exelon

March 2023 – September 2023

- Developed project workflows, Excel reports, and management presentations covering Unified Communications, voice modernization, patching, data center, firewall, and network operations initiatives.
- Supported the transition of Verizon platform ownership and internet circuit responsibilities during company separation activities.
- Created a strategic Microsoft Teams Voice modernization proposal, including objectives, conceptual voice design, PSTN connectivity models, direct-routing diagrams, workflows, responsibilities, and deployment timelines.
- Supported migration planning from Avaya and Cisco platforms to Microsoft Teams Enterprise Voice.
- Created ServiceNow support-ticket models, technical guidance documents, and configuration procedures for Unified Communications analysts.
- Partnered with senior leadership and technical teams to research technology solutions and align projects with business needs.

Voice Engineer | Open Technology Solutions

December 2021 – March 2023

- Led Microsoft Teams Voice and Teams Rooms technical delivery, including design, configuration, testing, and rollout.
- Built contact-center solutions using Auto Attendants, Call Queues, Chat Bots, and Microsoft Teams administration tools.
- Managed Microsoft Teams Rooms and Crestron XIO Cloud configurations, maintenance, and firmware upgrades.
- Provisioned users, managed Office 365 accounts and licenses, and served as a Microsoft Teams subject matter expert.

- Gathered technical requirements, created end-user quick-reference guides, and collaborated with network teams on endpoint connectivity.

Telecom Engineer | NTT Data / MedStar Health

April 2021 – December 2021

- Provided enterprise telecommunications and Microsoft Teams support while meeting service-level requirements.
- Managed user accounts, voicemail, call queues, PRI circuits, fax lines, office mailboxes, and contact-center applications.
- Designed and implemented call routing, contact-center skill layouts, CTI screen pops, call recording, and real-time reporting.
- Supported PBX, VoIP, back-office recording, fax, and content-display platforms through installations, maintenance, patches, and upgrades.
- Managed ServiceNow incident and service-request tickets in alignment with change and problem-management processes.

Unified Communications Supervisor | Maryland Judiciary

December 2018 – March 2021

- Led the design, implementation, deployment, monitoring, troubleshooting, and maintenance of statewide Unified Communications services.
- Implemented Office 365 / Microsoft Teams Voice solutions, including Auto Attendants, call queues, groups, and call routing.
- Supervised and mentored Unified Communications engineers, vendors, and support staff while managing priorities and service-level expectations.
- Managed VoIP, video conferencing, Polycom, Cisco, and collaboration systems across administrative and courtroom locations.
- Directed projects involving VoIP implementation, video-conferencing installations, vendor management, RFP participation, and service improvement.
- Created policies, procedures, training materials, reports, and technical guidance for staff and end users.
- Supported system architecture, network connectivity, routing, switching, QoS, security, disaster recovery, and business continuity practices.

Telecom Engineer | Mariner Finance

May 2017 – May 2018

- Evaluated emerging technologies and recommended improvements to telecom architecture, performance, and services.
- Provided advanced technical support for Mitel VoIP, IVR routing, contact centers, and enterprise telecom environments.
- Managed moves, adds, and changes; configured end-user phones and contact-center ring groups; and supported new-hire provisioning.
- Partnered with vendors and Information Security teams to meet technology and security requirements.
- Developed processes and procedures for IT Operations and third-party management of telecom environments.

VoIP Engineer | Lockheed Martin / CMS

July 2016 – November 2016

- Supported Cisco Unified Communications environments, including Call Manager, UCCX, WebEx, and contact-center operations.
- Participated in a Cisco Call Manager upgrade from version 8.6 to 10.5 using the Bulk Administration Tool.
- Configured VoIP phones, user accounts, service-desk queues, call-center scripts, recording capabilities, and networking maps.
- Handled Remedy requests and provided technical support to enterprise users and call-center teams.

Systems Administrator III | Baltimore City Schools

July 2011 – July 2016

- Administered and implemented telecommunications and networking infrastructure, including voice systems, switches, routers, wireless equipment, and VoIP services.
- Led enterprise VoIP upgrades and deployment initiatives, including transition from analog Centrex phones to VoIP handsets across central office and 11 district locations.
- Configured and supported Cisco Unified Communications Manager, Cisco Unity Connection, UCCX, call-center scripts, queues, applications, triggers, skills, prompts, and teams.
- Installed, configured, and troubleshoot Cisco and Extreme routers and switches, wireless access points, VLANs, TCP/IP, 802.1X, TACACS/RADIUS, and spanning-tree protocols.
- Provided desktop support including LAN/wireless troubleshooting, VPN support, printer installation, software installation, and remote support using Dameware.
- Monitored network performance and outages using SolarWinds; maintained equipment records and coordinated repairs, upgrades, and vendor support.
- Created technical standards, troubleshooting documentation, deployment plans, schedules, and cost-savings strategies.

IT Service Desk Team Leader / Customer & Operational Support Specialist II | Baltimore City Schools – Information Technology Department

March 2005 – July 2011

- Provided advanced Tier II support and leadership to Service Desk agents supporting end users and school-system stakeholders.
- Created and managed quality-assurance programs, staff schedules, training documentation, and call-handling procedures.
- Configured Cisco contact-center queues, scripts, teams, applications, and user accounts; provisioned VoIP users and supported service operations.
- Participated in executive-level meetings, translated application-support requirements, and disseminated technical information to service-desk staff.

- Supported recruitment, interviewing, staff evaluation, and operational improvement initiatives.

EDUCATION

American InterContinental University — Bachelor of Science, Information Technology | Completed July 2019

CERTIFICATIONS

- Microsoft Teams 720 Expert — Training and testing completed through Pearson VUE
- ITIL v4 Certified Expert
